

STÉPHANIA FORDANT

Product Designer - Design Systems, Accessibility & UX Research

Brussels, Belgium | +33 7 81 64 61 32 | hello@stephania-fdt.com

<https://stephania-fdt.com> | <https://www.linkedin.com/in/stephania-fordant>

PROFESSIONAL SUMMARY

Product Designer with over six years of experience turning complex challenges into simple, accessible and scalable digital products. I work across the full Product Design process, from UX Research and UI Design to delivery, with strong expertise in Design Systems, WCAG digital accessibility and cross-functional collaboration with product, business and engineering teams. My approach connects user needs, interface consistency and technical feasibility.

CORE SKILLS

Product Design | UX Research | UI Design | Design Systems and UI Kits | Design Tokens | Digital Accessibility - WCAG 2.1 AA | DesignOps and Governance | User Research and Interviews | Personas and User Journeys | Wireframing and Prototyping | User Testing | A/B Testing and Heatmaps | Card Sorting | Design Thinking Workshops | Cross-functional Collaboration | Agile and Scrum Methodologies

PROFESSIONAL EXPERIENCE

IT Product Designer | SPF Affaires étrangères de Belgique | April 2023 - Present

Consulting assignment through Cream Consulting and eGov Select | Brussels, Belgium

- Led the standardisation of several public-sector applications through UX audits, user interviews, benchmarking and technical constraint analysis.
- Created an Angular Material UI Kit and contributed to a scalable Design System combining reusable components, Design Tokens and Zeroheight documentation.
- Applied WCAG 2.1 AA accessibility requirements while collaborating with Business Analysts, Product Owners and developers.
- Facilitated workshops, card sorting sessions and user testing, increasing active participation by 20% within six months.

UX Designer / Marketing Project Manager | WellPack | February 2021 - January 2023

Paris, France

- Conducted user interviews, market research, benchmarking and testing to turn client briefs into evidence-based product and marketing decisions.
- Created personas, user journeys and reusable research frameworks for SMS, RCS and mobile acquisition projects.
- Defined the art direction and created a standardised UI Kit, reducing production time from four days to two.
- Designed mobile-first experiences and optimised WordPress websites, SEO and conversion journeys.

UI Designer / Social Media Manager | Femmes d'Influence | September 2019 - December 2020

Paris, France

- Created personas, empathy maps and user journeys for a digital community of three million followers.
- Conducted competitive analysis and A/B testing to improve the user experience across digital platforms.
- Contributed to the acquisition of 330,000 new followers and a 13% increase in loyal users.
- Designed user interfaces and digital content as part of a multichannel strategy.

SELECTED PROJECTS

SPF Foreign Affairs: Standardising public-sector digital products through an accessible Angular Material Design System.

Stéphanie Portfolio: Designing and developing an accessible portfolio with React, TypeScript, Tailwind CSS and an AI-assisted workflow.

Harmony: Designing a connected product experience based on user research.

Joga Aura: Designing and optimising a Shopify e-commerce journey from product discovery to conversion.
